

Js Baseclasses

These API's are found on components that inherits from the baseclass

Presentation Properties

skinName

Presentation Methods

changeSkin
loadSkin
__getLayoutNode
__setStyleClass

Alignment API

setAlignProperty
disableAlignment
enableAlignment
activateAlignment
purgeAlignment

Anchoring API

disableAnchoring
enableAnchoring
moveAnchoringRules
setHorizontal
setVertical
purgeAnchoring

Javeline IFDEF's

__WITH_ALIGNMENT
__WITH_ANCHORING
__WITH_PRESENTATION

Pres. Parts

only components with special parts are mentioned

Container, Errorbox, Text

Main: @container

FileUploadBox

Main: @caption, @icon, @button, @value, @slider, @slidemove

Frame

Main: @container, @caption

Menu

Main: @container
Item: @caption
Divider

ModalWindow

Main: @container, @drag, @title, @icon
Cover

Tab / Pages / Submitform

Main: @pages
Page: @container
Button: @caption

Statusbar

Main: @container, @corner
Panel: @icon, @caption

Toolbar

Main: @container
Bar: @container, @dragger
Divider

Presentation

Basic Skinning Syntax

<skin>
  <Tagname>
    <style><![CDATA[
      <!-- Put your CSS here -->
    ]]></style>
  </Tagname>

  <Presentation>
    <Main [options]>
      <!-- Put your HTML here -->
    </Main>
    <!-- Other elements for this component -->
  </Presentation>
</skin>
```

Advanced Presentation Parts

Datagrid

Main: @interaction, @head, @scrollhead, @rowhead, @body
HeadItem: @class, @caption
RowHeadItem: @class, @caption
Row: @class, @container
Cell: @caption
Loading
Empty: @container

Tree

Main: @container, @startclosed
Item: @class, @caption, @icon, @openclose, @select, @container
DragIndicator
Loading
Empty

Dropdown / List

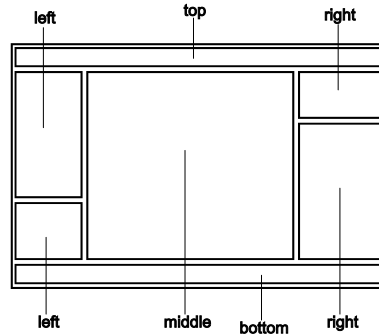

Main: @label, @button
Container: @contents
Item: @class, @caption, @select
Loading
DragIndicator
Empty: @caption

Grid Placement (@grid)

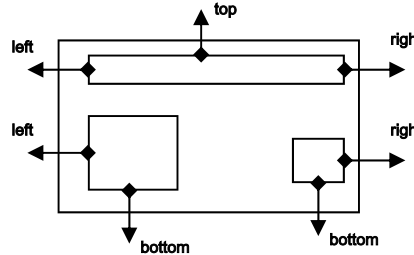

```
grid= "150,*,30"   cell-height= "20"
cell-padding= "5"  margin= "20,20,20,20"
```

Alignment (@align)

Anchoring

Skinning Example

```
<Tree>
  <style><![CDATA[
    .tree{}
    .treeFocus{}
    .treeDisabled{}
  ]]></style>

  <Presentation>
    <Main container="." startclosed="false">
      <div class="tree"> </div>
    </Main>
    <Item>
      class           = "."
      caption         = "label/u/text()"
      icon            = "label"
      openclose       = "span"
      select          = "label"
      container       = "blockquote"
    >
      <div>
        <span> </span><label><u></u>
        </label><blockquote> </blockquote>
      </div>
    </Item>
    <DragIndicator>
      <div class='dragtree'>
        <span> </span><label><u></u>
        </label></div>
    </DragIndicator>
    <Empty container=".">
      <div class="empty"></div>
    </Empty>
  </Presentation>
</Tree>
```
